HISTONE DEACETYLATION PLAYS AN IMPORTANT ROLE IN TRANSCRIPTIONAL REGULATION, CELL CYCLE PROGRESSION AND DEVELOPMENTAL EVENTS (BY SIMILARITY). IN DROSOPHILA, IT IS INVOLVED IN POSITION-EFFECT VARIEGATION (PEV) AND IS DIRECTLY INVOLVED IN COUNTERACTING GENOME SILENCING.

SUBCELLULAR LOCATION: NUCLEAR (POTENTIAL).

SIMILARITY: BELONGS TO THE HISTONE DEACETYLASE / ACUC / APHA FAMILY. HD SUBFAMILY 1.

"HDA1 and RPD3 are members of distinct yeast histone deacetylase complexes that regulate silencing and transcription.";
Proc. Natl. Acad. Sci. U.S.A. 93:14503-14508(1996).
-I- FUNCTION: RESPONSIBLE FOR THE DEACETYLATION OF LYSINE RESIDUES ON THE N-TERMINAL PART OF THE CORE HISTONES (H2A, H2B, H3 AND H4).
HISTONE DEACETYLATION PLAYS AN IMPORTANT ROLE IN TRANSCRIPTIONAL REGULATION AND CELL CYCLE PROGRESSION. TO MANY GENES INCLUDING TRANSCRIPTION ARD REPRESSION AND ACTIVATION OF MANY GENES INCLUDING CELL TYPE-SPECIFIC GENES (STE6, TY2 AND HO), CELL DIFFERENTIATION-SPECIFIC GENES (SPO13), GENES THAT RESPOND TO EXTERNAL SIGNALS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                STRAIN-S288C / FY1679;

     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
